

Baseline: qwen3.5:9b raw P(A)

All target/crop pairs; no score cutoff. M8 and square pins excluded. P(A) is not calibrated identity correctness.

* USB in scenes 101/303: manually verified crop recovered from a rejected depth cluster; not autonomous localization.

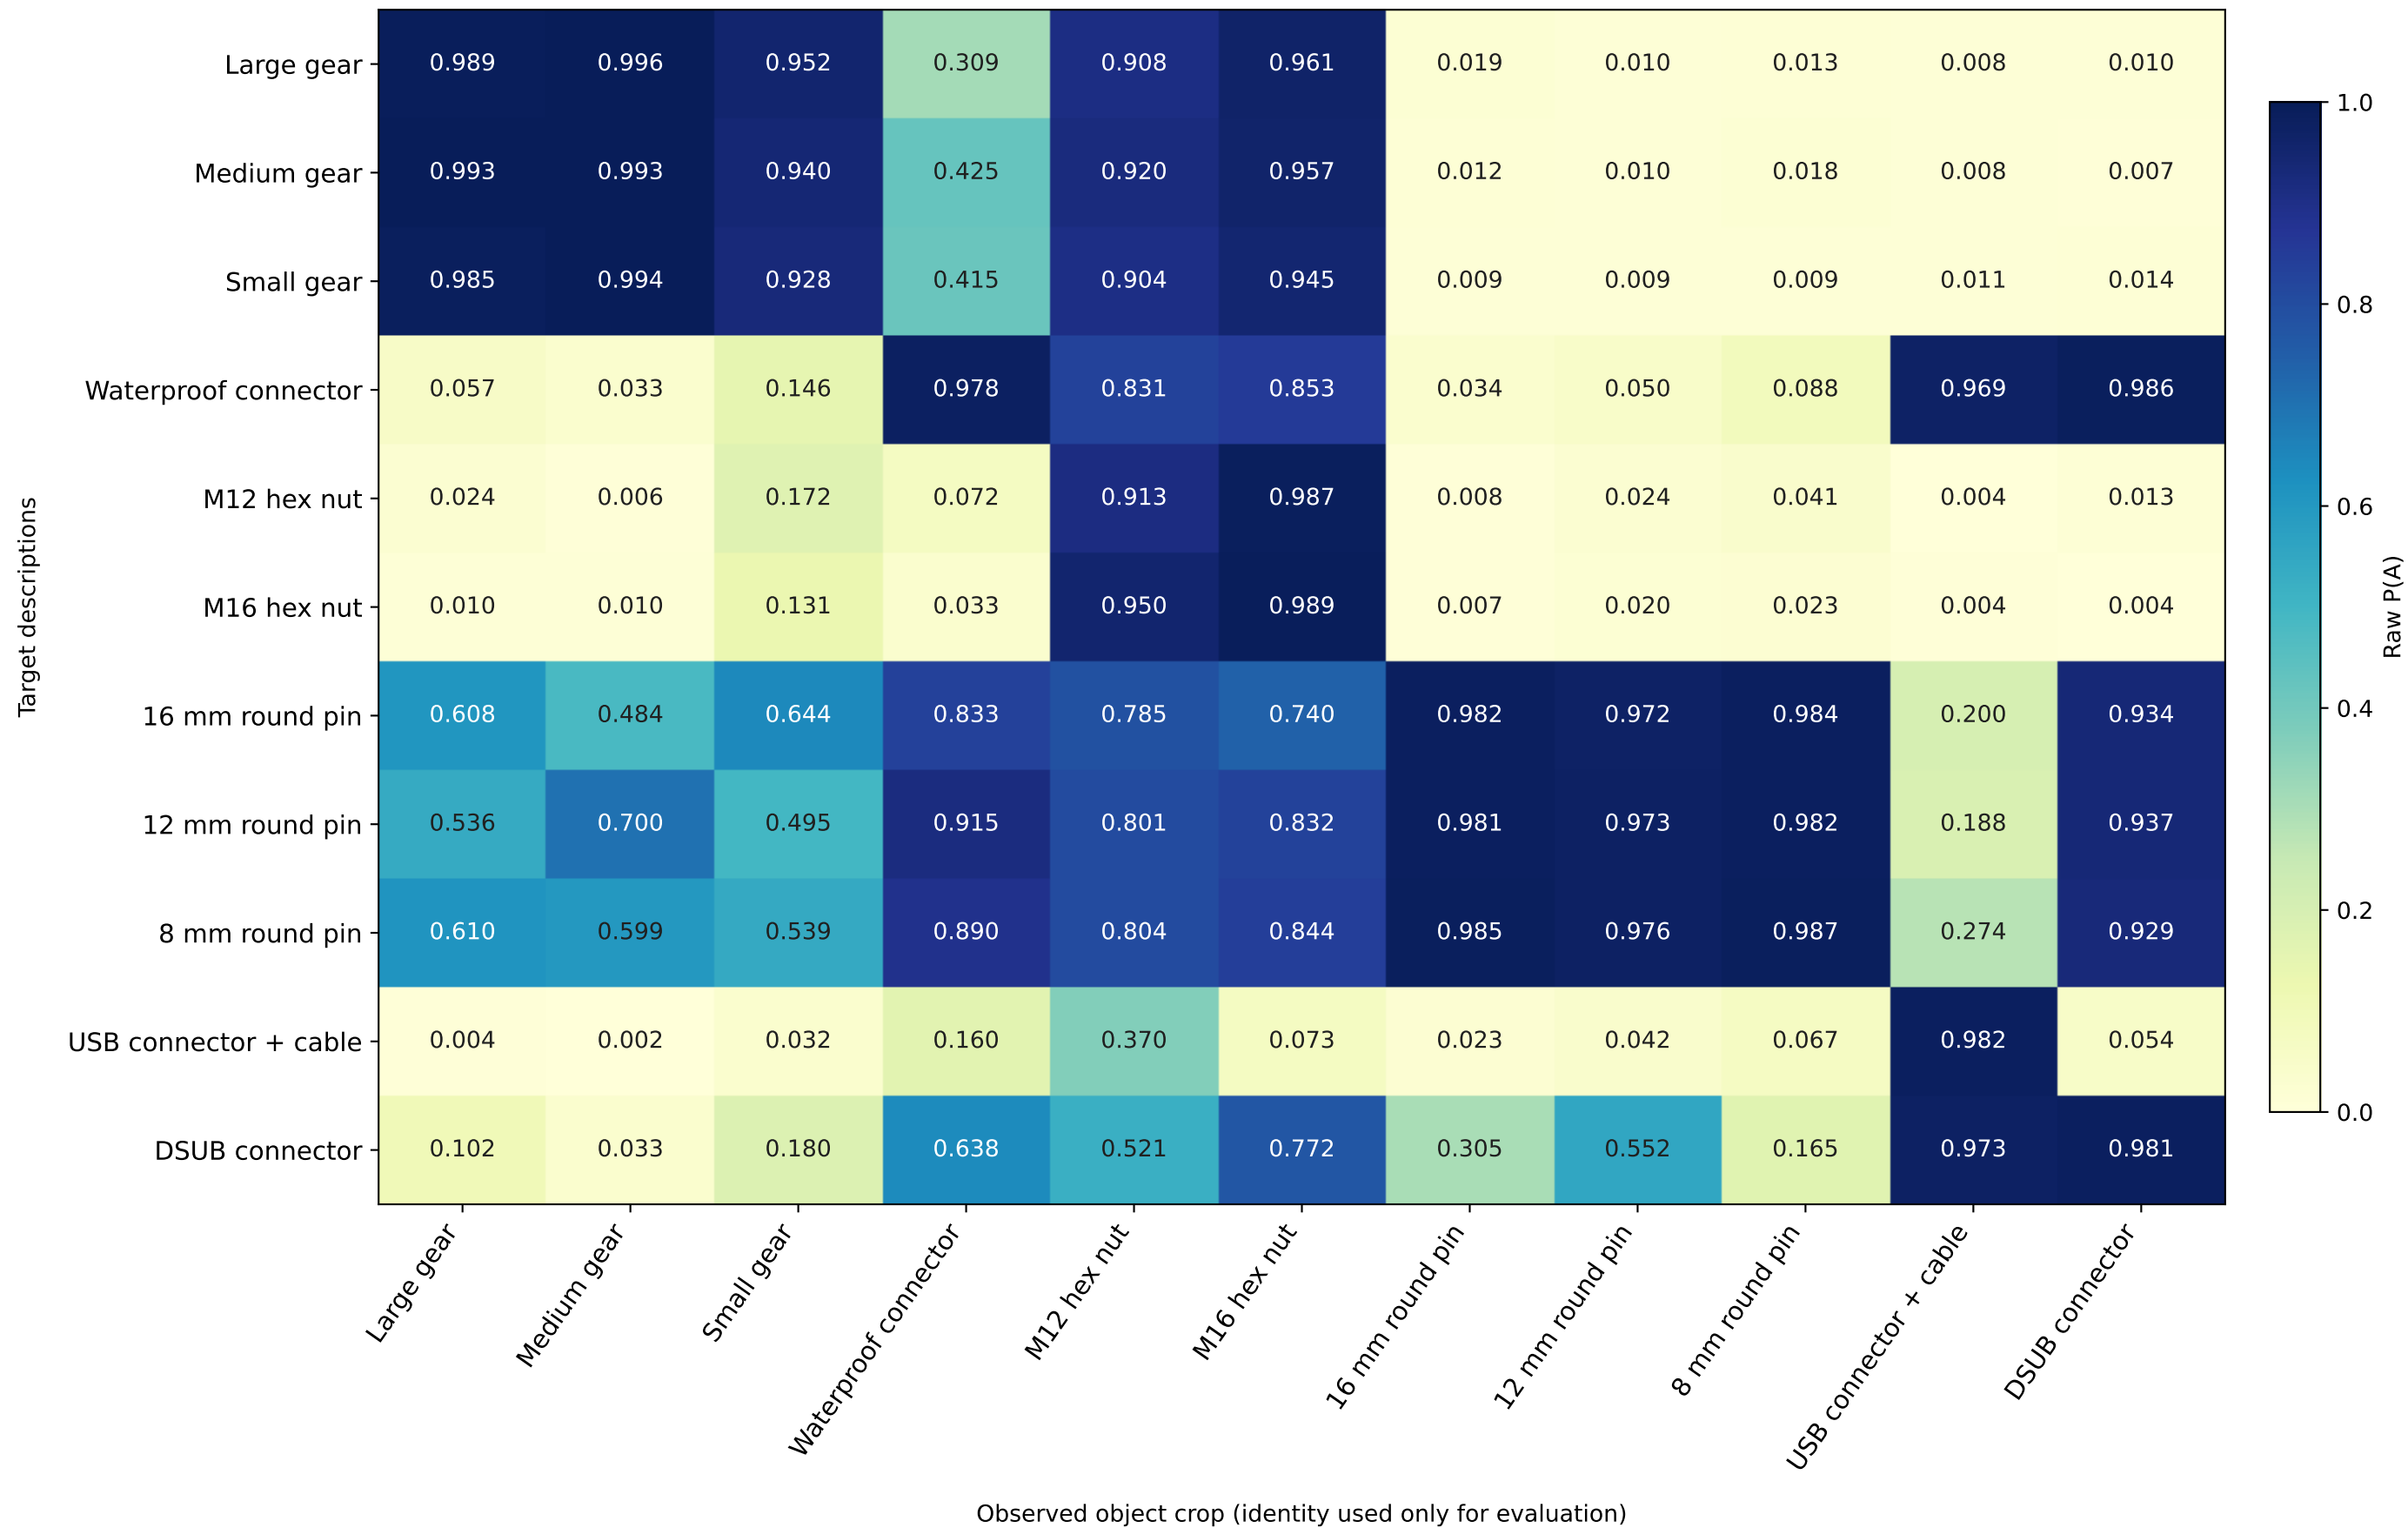

Scene 101: qwen3.5:9b raw P(A)

All target/crop pairs; no score cutoff. M8 and square pins excluded. P(A) is not calibrated identity correctness.

* USB in scenes 101/303: manually verified crop recovered from a rejected depth cluster; not autonomous localization.

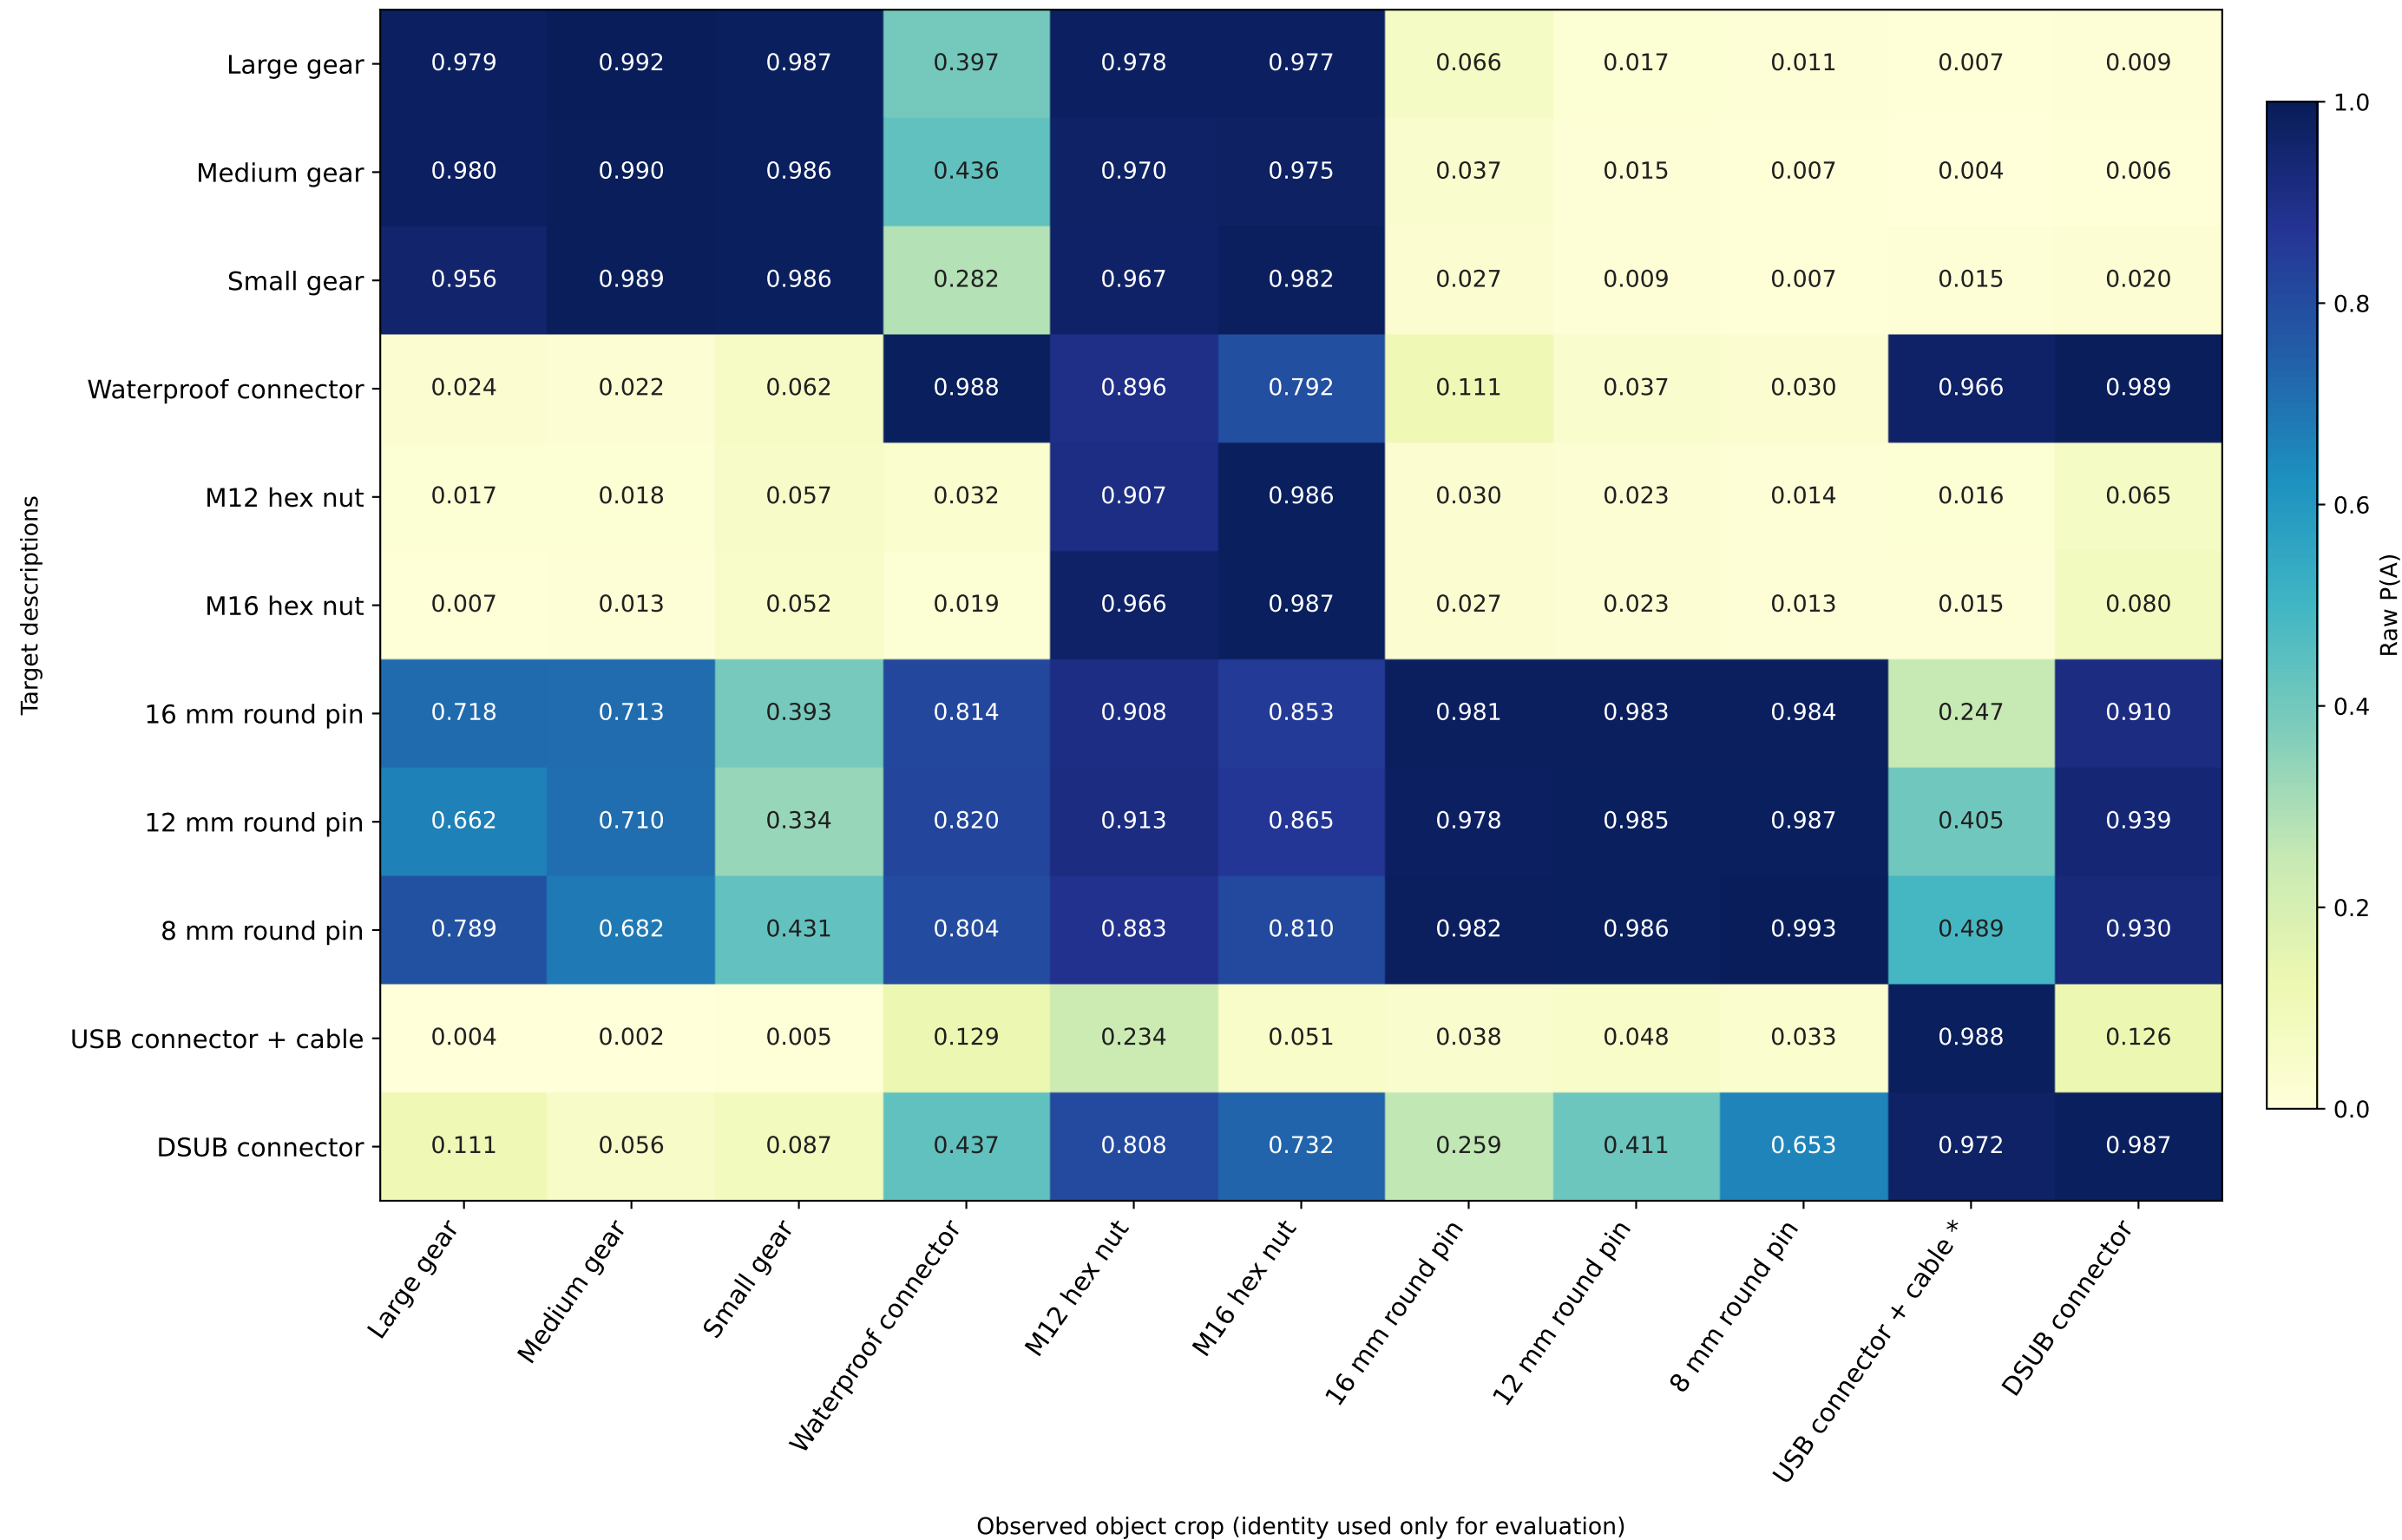

Scene 202: qwen3.5:9b raw P(A)

All target/crop pairs; no score cutoff. M8 and square pins excluded. P(A) is not calibrated identity correctness.

* USB in scenes 101/303: manually verified crop recovered from a rejected depth cluster; not autonomous localization.

Scene 303: qwen3.5:9b raw P(A)

All target/crop pairs; no score cutoff. M8 and square pins excluded. P(A) is not calibrated identity correctness.

* USB in scenes 101/303: manually verified crop recovered from a rejected depth cluster; not autonomous localization.
